

NL-F120RGB

LED Studio Soft Light

NL-F120RGB is a RGB type of NORDLYS SoftLights with narrow beam spread of light Enables creating pure red,green,blue and even mixture of them for any desire color Of light.

There is a special page in NORDLYS transmitter device(called TANYA) for our RGB Lights, with possibility of generating any color just by inserting RGB color code of The desire color; for instance vibrant hue of cyan color can be made by the fusion of Green and blue! and just a reminder,equal combination of all three basic colors ends Up to pure white light.

Also there is a visible color spectrum in RGB page that by touching each coordinates Of it, you'll be able to transfer that touched color to NL-F120RGB wirelessly!

It's worth mentioning,you can save your favorite color as presets and finally you can Have a dancing light in NL-F120RGB projector by capability of setting switching time!

Like every other NORDLYS devices and unlike Competitive light devices, NL-F120RGB is able to be moved horizontally (PAN movement) and vertically(TILT Movement) thanks to its built-in motors.

For the record, "NL-F250K2" supports standard protocol of light consoles(DMX) And standard protocol of joystick tables (Pelco-D).

Main Specification

- High resolution and smooth dimming With flicker-free light
- Wireless control of light and position With our local transmitter device called TANYA
- Due to the consumer's need, the Device is totally customizable to t your needs
- Device application: TV Studios, Black boxes, Theater scenes and all the locations with requirement of high quality light sources and precise color temperatures

For Cob LED

- Input Voltage: 110-240 Vac , 50/60Hz
- Total Power Consumption: 120 Watt
- Color Rendering Index: (CRI, Ra \geq 97), TLCI \geq 98
- Estimated LED Lifetime: 50,000 H
- Working environment Temperature: -20°C ~ 60°C
- Maximum humidity of working environment : %85
- Energy eciency : greater than 90% (high)
- DMX input/output Port type: XLR female/male connector
- Memorry type: internal eeprom(saving last parameters:address,level,cct,etc)
- Optical consideration:
 1. Four leaf barndoors
 2. Substitutable diusion panel (light,middle,heavy)
 3. Possibility of selecting LED lens angle (60,90,120)

Mechanical Features

- Dimension: 680 x 300 x 510 mm
- Weight: 9.7 Kg
- Lens Diameter: 200 mm
- Housing Material: Cast Aluminum
- Housing/Body color: Customizable
- Motors: PAN & TILT
- Mounting: Customizable (with clamp, pantograph,stand,etc)

Nordlys, Naturally Noble

At Nordlys, we are driven by innovation, continuously pushing the boundaries of what's possible in broadcast technology. We envision a future where media professionals have access to the best equipment, enabling them to tell their stories with clarity, creativity, and confidence.
